# DOCTOR OF PSYCHOLOGY

Faculty of Psychology  
University of Surabaya

ACCREDITATION: B  
BAN-PT Decree no. 3016/SK/BAN-PT/Akred/D/VIII/2019

## DOCTOR OF PSYCHOLOGY

The Ubaya Doctor of Psychology study program was established on January 10, 2018 (Menristekdikti Decree no. 22/KPT/I/2018). The study program is currently accredited B according to BAN-PT Decree number 3016/SK/BAN-PT/Akred/D/VIII/2019.

The study program was opened as Ubaya's concern in scientific development, especially psychology in Indonesia. In accordance with the vision and mission of the Ubaya Faculty of Psychology, the study program focuses on urban problems (Urban Psychology), which are then divided into Urban Mental Health, Urban Family and Education, and Urban Industrial and Organization.

## VISION

"To excel in organizing doctoral education, psychological research, and dealing with urban problems according to the dignity of life."

## MISSION

To produce graduates of the Doctor of Psychology study program who can produce research and scientific development related to urban problems in a professional, reliable, and reliable manner according to the dignity of life.

## GRADUATE PROFILES AND CAREER OPPORTUNITIES

- Scientist
- Researcher Supervisor
- Policymaker

## LEARNING OUTCOMES

The outcomes refer to the Ministry of Education and Culture Regulation no. 3/2020 concerning National Higher Education Standards and also AP2TPI Decree number 03/Kep/AP2TPI/2019 concerning the Core Curriculum for Doctoral Level Psychology study programs.

### ATTITUDES

1. Able to think critically, analytically, and systematically in preparing dissertation research.
2. Able to anticipate and adapt to changes in the strategic environment in technology and its impact on people's lives.
3. Able to master the psychological code of ethics, especially in research.
4. Able to manage time and research.

### KNOWLEDGE

#### • PSYCHOLOGY CONCEPTS & THEORIES

1. Able to evaluate, develop, and disseminate psychological concepts and theories, especially in urban settings, through mono, inter, multi, and trans-disciplinary approaches to explain and/or predict various psychological symptoms in individuals, groups, organizations, and communities.
2. Able to master the nature of the main research methods in psychology and specific methods and techniques for urban research settings.
3. Able to criticize data and technology effectiveness for science development.

### SPECIAL SKILLS

#### • ASSESSMENT

Able to evaluate, adapt, and develop assessment and measurement instruments and apply observation, interview, and other data collection procedures according to the Indonesian Psychology Code of Ethics for research purposes, especially in urban settings.

#### • INTERVENTION AND PROBLEM SOLVING

Able to develop research especially in urban settings to provide alternative solutions to current and future urban problems, and psychological intervention models for scientific development and community welfare.

#### • RESEARCH

Able to conduct basic or applied research oriented towards the development of psychology, especially in urban settings using quantitative and qualitative research methods with an inter, multi, or transdisciplinary perspective.
